

Manufacturing Development Center

Medical Device Focus

Prototype Service

Lanier Technical College's Manufacturing Development Center (MDC) is a facility designed to assist small manufacturing companies in their formative early stage. MDC's facilities are structured to easily expand office, warehouse, and manufacturing space on-site for our clients at our 53,000 ft² facility.

Client benefits include:

- **Reduced start-up costs through shared office resources**
- **The ability to expand business space in bite-sized increments**
- **Direct on-site access to experienced start-up professionals**
- **Access to Lanier Technical College's Center of Innovation for Manufacturing Excellence**

Automated Manufacturing R/D
